V. Reasoned statement under Rule 66.2(a)(ii) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. STATEMENT

Novelty (N)	Claims <u>1-16,21 and 23-33</u>	YES
	Claims <u>17-20 and 22</u>	NO
Inventive Step (IS)	Claims <u>1-16 and 23-33</u>	YES
	Claims <u>17-22</u>	NO
Industrial Applicability (IA)	Claims <u>1-33</u>	YES
	Claims <u>NONE</u>	NO

2. CITATIONS AND EXPLANATIONS

Claims 17-20 and 22 lack novelty under PCT Article 33(2) as being anticipated by Doshi et al.

Claims 17, 20 and 22 lack novelty under PCT Article 33(2) as being anticipated by Redding et al.

Claims 17-20 and 22 lack novelty under PCT Article 33(2) as being anticipated by Williams et al.

Claim 21 lacks an inventive step under PCT Article 33(3) as being obvious over Doshi et al, Redding et al or Williams et al. The specific cross-sectional shape of the conduit is considered to lack an inventive step, producing no new and/or unexpected results.

Claims 1-16 and 23-33 meet the criteria set out in PCT Article 33(2)-(3), because the prior art does not teach or fairly suggest a flexible conduit having a rigid reinforcement member in combination with a conduit, where both conduits are disposed within a cover.

Claims 1-33 meet the criteria set out in PCT Article 33(4), and thus have industrial applicability because the subject matter claimed can be made or used in industry.
